- Smart Hotel, City, and Country search available.
- Map Navigation.
- Real time customer support.

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability

Problem Statement

The 2g and 3g internet is the most preferred mode of internet usage by many people. But it is also very expensive especially for those people who run on a tight budget. They need something that is easy on the pocket.

Also public Wi-Fi is free and available at most places but there is a catch, after a certain time the internet access becomes limited and most importantly there are many hassles and costs associated with setting up a public Wi-Fi.

Free Wi-Fi internet service by Free as Air is the answer to these problems.

CIS Solution

It becomes difficult to keep inserting different login details every time one changes net access in public spots. Free as Air application keeps everything simple, all one needs to do is create a login id, open the Wi-Fi and the app will connect the user to the nearby hotspot. The application provides free and safe internet usage without any hidden costs. It offers direct connectivity to Wi-Fi internet and completely safe and secure internet connection with premium speed. Free as Air also helps with marketing and promotion of a business through advertisements.

Challenges While Implementation

Ensuring Wi-fi connectivity for all android devices and OS versions and automatic Wi-Fi connectivity when any free Wi-fi is found were a bit challenging tasks.

Positive Outcome

With Free as Air, one can enjoy safe and secure internet with no charges and avail unlimited downloads and usage. It also helps businesses boost their sales and revenues through advertisements.
