PROBLEM STATEMENT

DEFECTS IN CORE PROCESSES

The company wanted to build a system that helped increasing its customer base.

Document had to be properly converted from its uploaded format to a doc format.

The pages of the documents needed error-free counting for accurate price calculation.

CIS SOLUTION

IMPROVED SERVICE PROVISIONING FOR USERS

CIS analyzed these problems and resolved them with effective solutions. A pre-payment system, Wallet, was added to the site. An interesting functionality which was added was the conversion of money into points with specified conversion rate. CIS implemented company and customer affiliate programs to garner more customers for the site. Furthermore, attributes like format conversion of documents and calculation of number of characters and pages in a document were added to the application.

POSITIVE OUTCOME

With help from CIS solution, client was not only able to garner more customer base but they were also able to better manage the uploaded documents to their website. The improved payment functionality and other features helped client to build stronger relationship with their customers.
