Simplifying the process of obtaining credit insurance

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability

Customer Overview

Simplifying the process of obtaining credit insurance

The client's web application provides assistance to insurance applicants who require credit insurance plans from credit insurance companies. Client offers an easy, quick and efficient way to obtain credit insurance quotes.

Problem Statement

Online approach to the process of credit insurance application

Client wanted a solution where different stakeholders can easily store and manage data.

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability

CIS Solution

Devised a comprehensive web solution for the client

Any applicant interested for credit insurance needs to register with this web portal. Also the credit insurance companies will be registered with this web portal. The insurance applicant can fill out an application that will be sent to various insurance companies. The insurance companies will then make a quotation against the application. Insurance applicant will get the quotations from different insurance companies and he can then select the best one as per his needs.

Credit insurance company and the insurance

applicant can communicate with an insurance broker. "Live chat" feature was developed using Real Time Signal R technology using which insurance broker can answer queries from insurance company as well as applicant. The insurance company and the applicant can also share various documents and files using this live chat tool.

Agile scrum method was used to carry out this project. Any types of bugs were removed after careful analysis.

Positive Outcome

This project has been a great success and is being used by many companies in the United Kingdom.
